

循环之中的else: 如果for、while语句没有被break语句结束，则会执行else子句，否则不执行

练习：员工4人。录入这四位员工的薪资。全部录入后，打印“已经全部录入”。最后打印录入的薪资和全部的薪资。

```
STAFF_NUM = 4
staffs_salary = []

for i in range(STAFF_NUM):
    a = int(input("input the staff salary (input | to exit): "))
    if a == "|":
        break
    staffs_salary.append(a)
else:
    print("all right")

print()
for i in range(STAFF_NUM):
    print(staffs_salary[i])
print()
print(sum(staffs_salary))
```
