

039 多维列表

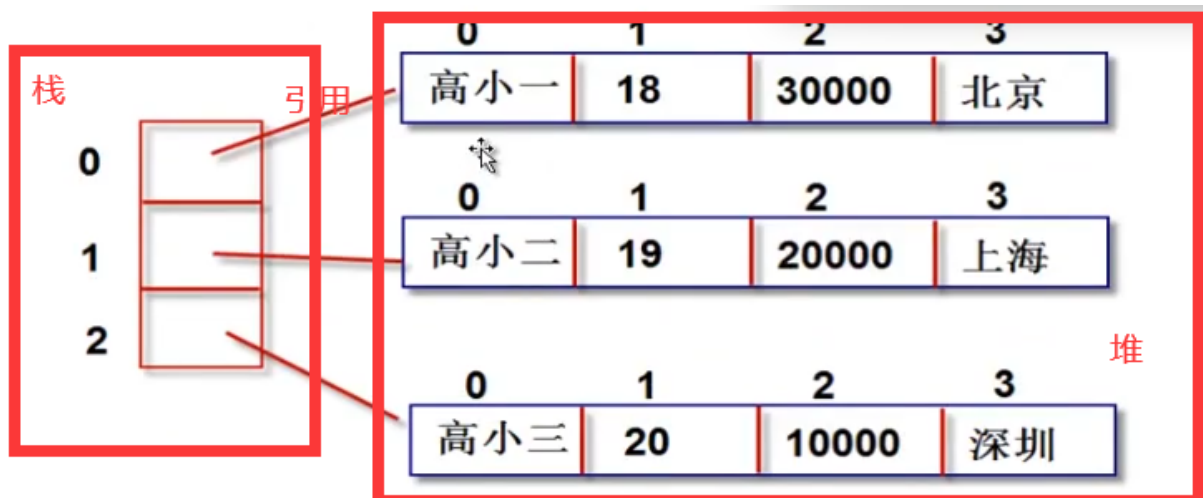

二维列表

一维列表嵌套列表，存储表格类的数据

源码：

```
a = [  
    ['A', 18, 30000, '北京'], # a[0]  
    ['B', 19, 20000, '上海'], # a[1]  
    ['C', 20, 10000, '深圳'], # a[2]  
]
```

内存结构图：

嵌套循环打印所有数据 (mypy_08.py)

```
a = [  
    ['A', 18, 30000, '北京'], # a[0]  
    ['B', 19, 20000, '上海'], # a[1]  
    ['C', 20, 10000, '深圳'], # a[2]  
]
```

```
for m in range(len(a)):  
    for n in range(len(a[m])):  
        print(a[m][n], end="\t")  
    print()
```
