## for循环

for循环通常用于可迭代对象的遍历。for循环的语法格式: for x in {可迭代对象}: {语句块}

## 可迭代对象

python包含以下几种可迭代对象:

- 1. 序列。包含: 字符串、列表、元组
- 2. 字典(使用的是键(keys),要值的话用.values())
- 3. 迭代器对象(iterator)
- 4. 生成器函数 (generator)

## range()对象

range()对象是一个迭代器对象,产生指定范围的数字序列。格式为: range({start,} {end} {,step})

## 练习:

```
1. for循环,累加和,偶数奇数累加和 num = 0 sum_all = 0 # 0-100所有数字的和 sum_even = 0 # 0-100偶数的累加和 sum_odd = 0 # 0-100奇数的累加和 for num in range(101):
    sum_all += num
    if num % 2 == 0: sum_even += num
    else: sum_odd += num
    num += 1

print('sum_all =', sum_all)
print('sum_even =', sum_even)
print('sum_odd =', sum_odd)
```
